Category:X-ray diffractionPages Thursday, April 28, 2010 The OASIS We have been to every amusement park west of the Mississippi, so seeing this one was a nice change. It is our first day in California and my first time at Six Flags Discovery Kingdom. We bought train tickets and boy was it an amazing day. I'm not usually one to buy into buying all of that stuff, but here we were in California and we wanted to go ride some roller coasters. If that's not an indication of growing up, I don't know what is. I've always wanted to ride the This Year's Special. We went all of the way up to the top and if you are wondering what's up there, we went to California's tallest structure, which is a surprise, but not at the top of the structure. They removed it because of security concerns but it is still there. The Loony Toons Loop is fun, but nothing compared to California Scream. It is a loop on the side of the park with three different rides, which is nice for two people. The park was so small and quiet that I didn't realize it would take so long to get on, until I was on. I didn't realize how slow the trains were going around the park, when the ride is supposed to be in the bottom of a canyon. On the train ride, the view outside isn't spectacular, but that is okay, because when you hit the end of the ride, you are right on top of the Looney Toons castle. Even after all of the the rides, we still took the train back up to the top for the Helicopter ride. My brothers actually made it, even though they were scared. I didn't think that the park could be any better than the other ones, but they've got the Croc chase and they have the best roller coaster in the park, which is the Superman Ultimate Flight. This is a multi-person coaster that lasts about six seconds, which is more than all the other roller coasters combined. The only problem with the park is that it is just too small. We only fit three kids in the car
